

## **Mean Median Mode and Range**

**Vocabulary that may seem strange**

**But it's not so tough - If you listen up.**

**Mean is the average - A total's what you get**

**Divide by how many - Are in your data set**

**Median is the middle - You order 'em up**

**If there's two in middle - You average 'em – yup!**

**Mode happens most - How often do you see 'em?**

**Mode happens most - Might be more than one**

**Range is difference - Between the big and small**

**Subtract the two ends - To find the range for all.**

## **Mean Median Mode and Range**

**Vocabulary that may seem strange**

**But it's not so tough - If you listen up.**
